## Email Security

Utilizing advanced AI based security, our solution offers detection and prevention against threat to your business with:

- Phishing Monitoring
- Impersonation Defense
- Account Takeover Protection

## Advanced Anti-Virus

With more sophisticated threats to your business, cyber-attacks are causing more business disruptions and financial loss than ever. Our Anti-Virus solution offers:

- Ransomware Protection via Behavioral AI
- Real-Time Threat Prevention
- 24/7 Managed Detection & Response

## Vulnerability Management

In order to protect against a cyber-attack, it is important to identify where to focus the risk mitigation. Our vulnerability assessment and monitoring include:

- Real-Time Risk Prioritization
- Cloud, Virtual and Container Assessment
- Accelerated Vulnerability Remediation

## Security Information & Event Management

Seamlessly integrated with our vulnerability management component, our SIEM solution is designed to keep you steps ahead of the most sophisticated cyber attackers. Our SIEM solution gives you the ability to:

- Easily Spot Anomalous Activity or Threats
- Speed Up Investigations and Response via Automation
- Know How to Respond via Built-in Detections Library
- Leverage Internal and External Threat Intelligence

## Secure Data Backup & Disaster Recovery

To avoid your data being lost or a major business disruption, it is important to have the right security backups and disaster recovery plan. Acrisure Cyber Services can help you with:

- Malware detection
- Backup to a private or public cloud
- Avoid Business Disruption and Maintain Revenue Security

## Security Awareness Training

Cyber security awareness training is an effective way to educate your employees on how to identify and avoid potential cyber threats. Our Security Awareness Training solution:

- Offers Videos, Phishing Simulations and Games to Ensure Employee Engagement
- Teaches employees how to avoid being tricked by cyber criminals
- Enhances Overall Cybersecurity Posture
